Title: Bartenders Helper

1. Introduction:

This site will help it's users construct a cocktail. The bartender can pick a cocktail.
The recipe will be delivered in a full page view but can also viewed as a "page-per-step"
where each step is full screen and you can "swipe right" to go to the next step. It is
intended to be viewed on a tablet or mobile device.

The main page will show a "cocktail of the day".
There is a search form and a "by category" page.

2. Features

  - "Card-per-Step"
  - Search
  - Coctail of the day

Head Frame Spirits
  - I like the animations on the cards

Punchdrink Recipes
  - I like the adjective tags for each recipe (ie. sour, citrusy)
